

LayoutQ
for pro shops

The brain next to your spec sheets.

Your spec sheets record what you drilled. LayoutQ works out what to drill next, for each customer, from their own numbers.

At the counter

- Every customer's fit specs, PAP, speed and rev rate, and their bag with the layouts in each ball, on one screen, with your own spec sheet attached.
- A Dual Angle Layout for any ball in a catalog of more than 1,200, computed for that bowler: drilling angle, pin-to-PAP, and VAL angle, with the reasoning.
- The gap in their bag and the next ball that fills it, with a starting surface, before they ask what to buy.
- Bowlers keep their own arsenal, surface maintenance and live-session coaching in the same app, and share their record with your shop by choice.

What it does not do

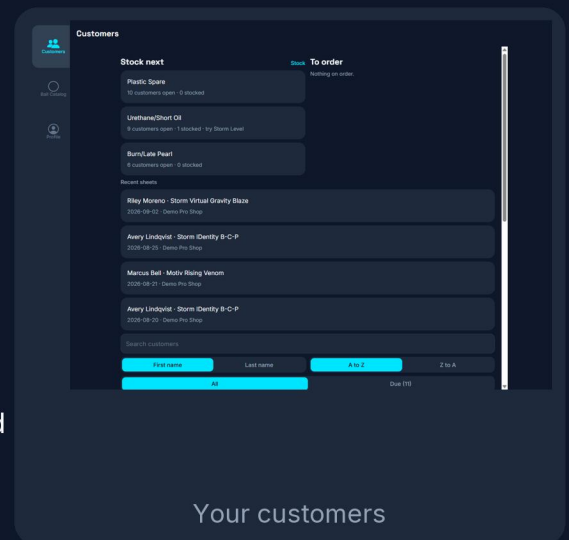

No work orders, invoicing, inventory or point of sale. Keep Spectre, AKM or your binder for that. LayoutQ sits beside them.

How it works

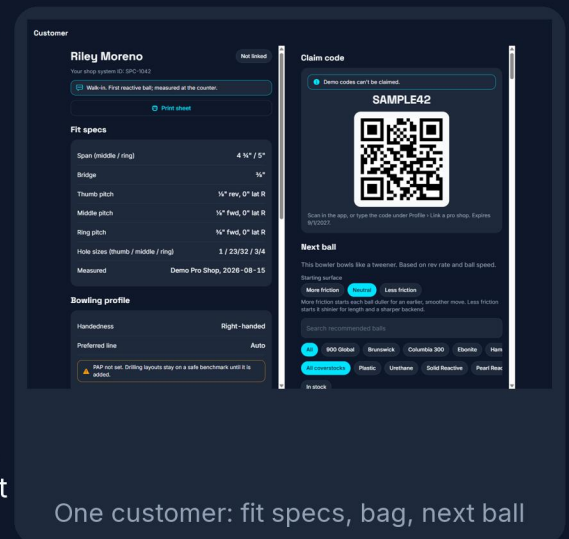

1. At the counter, create the customer, enter the fit specs, drill the ball, and record the sheet. Print it or text the claim code.
2. The bowler installs the free app and enters the code; the record lands in their arsenal, and every later drilling syncs to them.
3. Layouts are LayoutQ suggestions; you verify fit and layout and decide what gets drilled.

Pricing

Free for bowlers, and for shops with up to 25 customer records. Companion is \$12 a month or \$120 a year. The first 20 shops get it at \$9 a month, locked.

Your customers

One customer: fit specs, bag, next ball
